

Relebogile Samuel Ramahlo

BSc Computer Science (Final Year) | University of Limpopo

relebogile.samuelramahlo@gmail.com | 067 367 1292 | github.com/Relebogile-Samuel | Polokwane, Limpopo, South Africa

PROFESSIONAL PROFILE

Motivated and detail-oriented final-year BSc Computer Science student at the University of Limpopo with a strong foundation in software development, systems programming, and database management. Demonstrated ability to deliver real-world technology solutions through independent projects and academic work. Passionate about leveraging technology to solve meaningful problems — from healthcare innovation to community-driven software. Seeking the Investec Tech Graduate Programme to grow as a technology professional within a forward-thinking, purpose-led organisation.

EDUCATION

BSc Computer Science

University of Limpopo | 2022 – Present (Expected 2025/2026)

- Core modules include: Data Structures & Algorithms, Operating Systems, Computer Architecture (x86 Assembly), Database Systems, Software Engineering, and Web Technologies
- Consistently engaged in practical coursework applying programming concepts across multiple languages and paradigms

TECHNICAL SKILLS

Programming Languages

- C++ — Object-oriented programming, memory management, systems-level development
- Java — Application development, OOP principles
- Python — Scripting, data processing, rapid prototyping
- x86 Assembly — Low-level programming and computer architecture

Web & Database Technologies

- HTML, CSS, JavaScript, PHP — Front-end development, responsive web design, and server-side scripting
- SQL — Relational database design, querying, and data management

PROJECTS

VitalCare — Iron Deficiency Nutrition Tracker | Academic Group Project | 2025 – Present

- Co-developing a health-tech system that enables users with iron-deficiency anaemia to calculate and track iron intake from food sources
- Designing a food database integrated with an intuitive user interface to provide dietary recommendations based on iron content
- Applying software engineering principles including requirements analysis, system design, and iterative development within a team environment
- Demonstrates ability to build socially impactful, user-centred technology solutions

Student Portal & Login System | Academic Project | 2024

- Designed and developed a full-stack student portal allowing students to register, log in, and manage their academic profiles
- Captured and stored student details and module codes, with dynamic display of personalised information upon login
- Built using HTML, CSS, JavaScript and PHP with server-side processing and form handling

- Demonstrated understanding of web application architecture, user authentication flows, and data management

Pastor's Church Website | Freelance / Volunteer Project | 2024

- Independently designed and developed a fully functional website for a local church leader using HTML, CSS, and JavaScript
- Managed the full project lifecycle — from requirements gathering and design to deployment — demonstrating client communication and self-directed delivery
- Delivered a clean, accessible, and mobile-responsive web presence for a real-world stakeholder

LEADERSHIP & EXTRACURRICULAR

Class Representative (×2 Modules) | University of Limpopo | 2023 – 2024

- Served as Class Representative for two academic modules, acting as the primary liaison between students and lecturers
- Facilitated study groups, communicated student concerns, and contributed to academic support initiatives
- Both modules recorded measurable improvements in student performance during the periods of representation — a testament to a proactive and collaborative leadership approach
- Developed key professional skills including stakeholder communication, conflict resolution, and team motivation

WHY INVESTEC TECH GRADUATE PROGRAMME

Investec's commitment to making a real difference — both in financial services and in the communities it serves — aligns strongly with my values as a developer. The Graduate Programme's focus on innovation, collaboration, and technical excellence mirrors the skills I have cultivated through my studies and projects. I am eager to contribute fresh perspectives, grow within a high-performance team, and build technology solutions that create lasting value for clients and society.
